

Versa-Fogger

The First True Gasoline Powered Backpack Fogger

The Versa-Fogger is a jointly developed product between B&G and Curtis Dynafog. Unlike a conventional mistblower, by adjusting the output of the nozzle, this unit is capable of providing a broad range of flow rates and particle sizes for proper insect control.

- » Reliable Honda 4 stroke motor -
No need to mix oil with the gas
- » Lower operating costs as compared to a 2 stroke motor
- » Emissions compliant motor
- » Transistorized ignition insures a quick start every time.
- » High strength aluminum frame
- » 1 Gallon solution tank
- » Adjustable handheld nozzle. Can be adjusted from a very fine to heavy fog
- » Three stage rotary blower - Creates high pressure air for optimum atomization of liquid
- » Lightweight - less than 26 lbs (dry weight)
- » Quiet 4 stroke operation
- » .67 quart fuel capacity
- » Carrying handle
- » 2 year motor warranty (1 year other components)

The Versa-Fogger is designed for a wide variety of applications from Mosquito Control to Insect Control in a warehouse environment. Its heavy duty, all metal construction, along with a deluxe backpack harness will give years of dependable service.

ORDER#	DESCRIPTION
45000000	Versa-Fogger

The Versa-Fogger provides a finely atomized fog at a high velocity. It provides good penetration into foliage along with a far reaching fog plume to treat remote areas.
