SILVANDERSSON

AGRISENSE

BUILT ON A LEGACY OF BEING THE BEST IN PEST CONTROL.

We know how important the balance between control and extermination is. With our rich knowledge of the industry, history of innovative product development and expert technical support, our extensive product range is designed to ensure that pest professionals can select the right product for every pest problem. Our brands were born out of a need to create better equipment, and that same drive fuels our research, quality manufacturing and intentional innovation.

B&G

B&G designs and manufactures equipment based on in-depth knowledge of the pest control industry worldwide. The world-famous B&G tank sprayers have the highest quality stainless steel combined with special-grade brass, and chemical-resistant gaskets and hoses to provide durable and dependable service. They are the first choice of professionals throughout the pest control industry, with models to suit every application need.

CURTIS DYNA-FOG® Ltd.

Known around the world for best-in-class disinfection and flying insect control equipment, Curtis Dyna-Fog continues to raise the bar. Their versatile catalog of products also features heavy-duty commercial foggers for large spaces, bird repelling and stored crops. Dyna-Fog equipment is trusted in nearly every corner of the world with endless versatility, dependable quality and masterful engineering.

SYNERGETIC®

Backed by patented technology and expert research, Synergetic© leads the flying insect control space in fly lights, bulbs and glue boards. Customers across North America stake their reputation on Synergetic products to rid spaces of flies, wasps and other flying insects. With innovative green light and LED technology, our products have been independently proven to attract a wider range of insects from farther distances.

SPRAYERS

PRECISE. POWERFUL. PROVEN.

Born from a need for better equipment, B&G Sprayers are the rock of the professional pest control industry. Trusted by pros around the world, our equipment is crafted to be dependable, easy to repair and versatile for any challenge on the job. Choose from our complete line to add the most reliable sprayers and accessories available to your operation.

PRIMELINE SPRAYERS

PRIMELINE SPRAYERS

ICONIC FOR A REASON.

The B&G Primeline is known as the most reliable sprayer in pest control. Designed for years of dependable service, this iconic sprayer has the highest quality stainless steel combined with special-grade brass and chemical-resistant gaskets and hoses to take down any challenge, year after year. They are the first choice of professionals throughout the pest control industry, with models to suit every application need.

FEATURES

- .5-, 2-, 3-gallon and 5-liter capacity
- 9-inch, 18-inch and 24-inch extensions

PRIMELINE SPRAYERS

EXTENDA-BAN

FEATURES

- Extenda-Ban: Top quality valve for instant tip shut-off
- B&G 4 Way Tip: With fine fan, coarse fan, pin stream and either a Crack & Crevice Straw orifice (CC) or a second pin stream (S)

COMPACT SPRAYERS

Lighter and more portable, our compact sprayers go everywhere you go with ease.

ACCUSPRAY ELITE

THE FUTURE IS HERE.

The AccuSpray compact sprayer (16 oz) is a great tool to bring along for any commercial or residential pest control job and is a terrific complement to the standard B&G tank sprayer. Use the crack-and-crevice straw and/or atomizing spray to treat the less-accessible, hard-to-reach spaces.

FEATURES

- Comes with a carry pouch that attaches to your belt
- Valve inserts into pouch for added convenience
- AccuSpray Elite model features stainless-steel bottle and heavy-duty hose
- Brass Extenda-Ban valve
- Wide variety of tips

COMPACT SPRAYERS

ACCUSPRAY ELITE - 4 WAY TIP WITH CRACK AND CREVICE STRAW AND NEXT GENERATION VALVE

- Light weight non-slip valve
- Made from Durable Polymer
- Termite injection tip available

AEROSOL DELIVERY

PORTABLE AEROSOL SYSTEM (PAS)

Modern pest control requires more than one application method. Get deep wall penetration, along with crack-and-crevice and localized fogging capabilities in one ideal tool. The B&G ULV Portable Aerosol System is designed for adaptability, giving operators the option to integrate liquid and aerosol products in one application, or make use of each delivery method individually.

FEATURES

- Can be adjusted for delivery of a very fine ULV fog to a heavy mist to handle most applications
- 1-gallon tank can be removed from case for cleaning or filling
- Brass and stainless-steel gun with choice of 9-inch or 18-inch extension, 10-foot coiled hose on standard model
- Delivers both water- and oil-based formulations with low to moderate viscosity
- 10-foot hose provides mobility
- Adjustable flow rates: 4-10 oz/min
- At maximum flow rate (gauge 30 psi), droplet size is 40-50 microns, droplet throw 15 feet with effective distance of 10 feet
- Coverage: 20 sq ft (at 30 psi)

PORTABLE AEROSOL SYSTEM (PAS)

ITEM #	DESCRIPTION	MODEL #	ORDER #
1	PAS with 9" Extension	-	16290000
2	PAS with 18" Extension	-	16300000
3	Commercial PAS with 9" Extension	-	16270000
4	Commercial PAS with 18" Extension	-	16400000

PORTABLE AEROSOL SYSTEM (PAS), CART MOUNTED

FEATURES

- Three-gallon stainless tank for extra capacity
- 15-foot coiled hose
- 18-inch stainless steel extension and tip
- Delivers both water- and oil-based formulations with low to moderate viscosity
- Adjustable flow rate: 4–10 oz/min
- At maximum flow rate (gauge 30 psi) droplet size is 40–50 microns, droplet throw 15 feet with effective distance of 10 feet
- Coverage: 20 sq ft (at 30 psi)

1	Pressurizing Tank Top	-	22046000

SPRAYER CADDY

Mounts in service vehicle and holds Primeline sprayers firmly in place. Helps prevent damage or chemical spillage during transportation.

FEATURES

- Heavy duty metal construction
- Chip resistant finish
- Mounting holes for either side or bottom mounting

ITEM #	DESCRIPTION	MODEL #	ORDER #
1	Caddy - 1 gallon and 5 liter - tall	-	11009850
2	Caddy - 2, 3 gallon and 5 liter - short	-	11009860

SPRAYER ACCESSORIES

1 COMFORT GRIP

- Reduce fatigue
- Non-slip grip
- Identify product in the spray tank
- Great for replacements

6 TECHNICIANS EMERGENCY KIT

Commonly needed parts for most B&G equipment. Includes easy to understand drawings of parts, repair hints, and refill quantities. Works in conjunction with the Office Emergency Kit as a refilling station.

4 - 7 FIRST AID KITS

Same as the Gasket Kit but includes higher volumes of all parts. Good for conducting Care & Maintenance classes for an entire office.

7 OFFICE EMERGENCY KIT

Contains more quantities of those parts in the Technician Emergency Kit and also has many less common parts not included in the Technician Emergency Kit. Recommended for office supply rooms. Good for offices with 3 to 8 technicians. Includes easy to understand drawings of parts, repair hints, and refill quantities.

FOGGERS

UNBEATABLE PERFORMANCE. UNRIVALED QUALITY.

Our foggers sit in a class of their own, with user-friendly innovation and unmatched coverage. Proven through constant testing and development, Curtis Dyna-Fog and B&G foggers continue to raise the bar for efficacy in disinfection, pest control and flying insect control.

HURRICANE ES

ELECTROSTATIC EFFICIENCY WITH CONSISTENT COVERAGE.

PORTABLE ELECTROSTATIC AEROSOL APPLICATOR (ULV/MISTER)

ELECTROSTATIC TECHNOLOGY

The Hurricane ES™ utilizes electrostatic technology to charge each droplet to provide effective application of formulations. The droplets stay separated due to the charged nature allowing uniform coverage on the entire target surface.

DISPENSES WATER-BASED PRODUCTS

The Hurricane ES™ is ideal for use in spraying commercial and residential areas. Hotels, schools, greenhouses, warehouses, medical facilities, sanitation, germicidal treatments and disease control programs are markets where the Hurricane ES™ is used.

FEATURES

- Precision flow rate and droplet control
- Uniform and consistent coverage
- Droplet size can be controlled for both ULV and residual spraying
- Stainless-Steel Metering Valve

COMMONLY SPRAYED SOLUTIONS

- Insecticides
- Disinfectants
- Deodorizers
- Fungicides
- Odor Neutralizers
- Water (Humidification)
- Germicides
- Poultry Vaccines

SPECIFICATIONS

HURRICANE ULTRA II

The Hurricane Ultra II is a premier choice for industrial and residential areas—from farms, greenhouses and warehouses to disinfection and disease control programs. Its chemical-resistant precision nozzle and low-profile, sturdy tank make the Hurricane Ultra II both functional and incredibly reliable.

FEATURES

- Rugged design handles corrosive liquids and heavy impacts.
- Dispenses both oil- and water-based formulations
- Solid stainless-steel metering valve for delivering precise outputs and maximizing use of chemicals
- Low profile tank design virtually eliminates tipping...empty or full!
- Droplet sizes can be controlled for both ULV spraying and residual spraying.
- Hurricane Ultra II will replace the Hurricane, Hurricane Ultra, Sanitizer and Anileator. Anileator orifice kit must be purchased separately and installed. Anileator orifice kit part # 62234.

COMMONLY SPRAYED SOLUTIONS

- Insecticides
- Disinfectants
- Deodorizers
- Fungicides
- Odor Neutralizers
- Water (Humidification)
- Germicides
- Poultry Vaccines

SPECIFICATIONS

ADJUSTABLE FLOW RATES	00-6.6 oz/min (3 gallons/hour)
DROPLET SIZE	10-50 microns
COVERAGE FOR WATER-BASED APPLICATION	60-80 sq ft
TANK CAPACITY	1 gallon (3.8 liters)
DIMENSIONS	H 14 in / W 12 in / L 12 in
WEIGHT	6.6 lbs (Empty)

PRECISION NOZZLES

- *Uniform and consistent coverage*
- *Three precision nozzles for greater output*
- *Chemical-resistant for maximum reliability*

1-GAL TANK

- *Translucent for easy visual reference*
- *Corrosion & impact resistant*
- *Low-profile design virtually eliminates tipping*

6-FT ELECTRIC POWER CORD INCLUDED

HURRICANE ULTRA II

ITEM #	DESCRIPTION	MODEL #	ORDER #
1	110/120 volt AC, 6.8 Amps, 50/60 Hz	Hurricane Ultra 2 120V	62150-1
2	220/240 volt AC, 3.4 Amps, 50/60 Hz	Hurricane Ultra 2 240V	62150-2

CYCLONE ULTRA

The Cyclone Ultra has a 2-stage blower and metering valve assures particles under 20 microns regardless of flow rate. Ideal for areas such as hospitals, nursing homes, schools, apartment buildings, restaurants and greenhouses.

The Cyclone Ultra can apply pesticides, deodorants, fungicides, duct sealant, disinfectants and miticides, efficiently and economically. The Cyclone can be used in indoor/outdoor applications requiring 5-20 micron droplets.

FEATURES

- Delivers both water- and oil-based formulations with moderate to high viscosity

SPECIFICATIONS

ADJUSTABLE FLOW RATES	1.4–3.1 oz/min, 0.6–1.5 gal/hr
DROPLET SIZE	8–10 microns, droplet throw 8–12 ft (formulations with high viscosity have larger droplets, 20-24 microns)
BLOWER	Continuous duty, 200,000 rpm with replaceable brushes
TANK SIZE	1-gal tank
WEIGHT	9.3 lbs (empty)

MICROTEC™ NOZZLE

- *Creates small, consistent droplets*
- *Apply disinfectant without wiping*
- *Reliably disinfect heavily trafficked areas*

METERING VALVE

- *Allows for easy control of output and droplet size*

1-GAL TANK

- *Translucent for easy visual reference*
- *Corrosion & impact resistant*

6-FT ELECTRIC POWER CORD INCLUDED

2	Cyclone Ultra 220 Volt	2736	62250-2

TORNADO, TORNADO FLEX

The multi-range Tornado has a 3 gallon tank for extended use, large formulation filter with removable screen and a precision metering valve that allows outputs from a mist of 5 gallons per hour down to ULV range. Ideal for humidification control in greenhouses and application of germicides and disinfectants. These foggers can be used to apply pesticides, deodorants, fungicides, disinfectants, and duct sealant. Treatment sites include hospitals, schools, resorts, food processing plants, warehouses, and dairy, poultry, and horse facilities.

FEATURES

- Delivers both water- and oil-based disinfectant formulations with moderate to high viscosity
- Precision metering valve
- Outputs from a mist of 5 gal/hr down to ULV range

SPECIFICATIONS

INPUT POWER	110/120 V AC, 8.5 amps, 50/60 Hz; 210/250 V AC, 4.2 amps, 50/60 Hz (model 3004)
ADJUSTABLE FLOW RATES	2.4-11.4 oz/min, 1.1-5.3 gal/hr
FLOW RATE	0–18.5 LPH
DROPLET SIZE	5-40 microns
TANK CAPACITY	3 gallon (11.4 liters)
WEIGHT	Tornado: 18.8 lbs (empty) Tornado Flex: 20 lbs (empty)

TORNADO FLEX

- *18-in flexible hose for directional application and precision*

PRECISION NOZZLE

ADJUSTABLE TILT LOCKING KNOB

3-GAL TANK

- *Large capacity for extended use*
- *Translucent for easy visual reference*
- *Corrosion & impact resistant*

FLEX-A-LITE 2600

A REPUTATION OF EXCELLENCE.

With its brawny construction and rugged dependability, the Flex-A-Lite 2600 sets the industry standard for heavy-duty point-and-spray foggers. A 1.5-gallon tank and four sturdy feet make it ideal for most industrial, sanitization and janitorial applications. Each fogger is individually built and tested for performance.

SPECIFICATIONS

HOSE	18 in
TANK SIZE	1.5-gal tank
ADJUSTABLE FLOW RATES	0–9.4 oz/min, 0–4.4 gal/hr
DROPLET SIZE	ULV (20–35 microns) to power mist (56 microns), droplet throw 15 ft
COVERAGE	40 sq ft at high application setting
WEIGHT	9 lbs (empty)
DIMENSIONS	H 12 in /W 8.5 in / L 15 in

FEATURES

- Delivers both water- and oil-based formulations with moderate viscosity
- Available with 110V or 220V connections

FLEXIBLE HOSE

- *18-in hose allows for directional application*

HEAVY-DUTY HANDLE

POWER CORD STRAIN RELIEF

STURDY BASE

- *Rotationally molded with seamless design for maximum strength*

BACKPACK FOGGERS

Put on a backpack fogger and bring power everywhere you go. Reliable and extremely mobile, our backpacks let applicators accurately disinfect or fog any spot they need.

VERSA-FOGGER

The Versa-Fogger provides 20-35 micron ULV droplets and 56 micron power mist droplets. Portable and powerful, Versa-Fogger is designed for a wide variety of applications from mosquito control and insect control to disinfection. With mobility, range and precision, this backpack fogger fully covers every target. Its heavy-duty construction, along with a deluxe backpack harness, will give you years of dependable service.

FEATURES

- Delivers both water- and oil-based formulations
- Reliable Honda 4 stroke motor - No need to mix oil with the gas
- Emissions compliant motor
- 1-gallon, pressurized formulation tank
- Adjustable handheld nozzle
- Three stage rotary blower
- Lightweight - less than 26 lbs (empty)
- .67 quart fuel capacity
- 2-year motor warranty (1-year other components)

SPECIFICATIONS

ENGINE	Honda 4-stroke
SYSTEM	Gasoline-powered backpack
HOSE	4 ft
TANK SIZE	1-gal tank
WEIGHT	26 lbs (dry weight)
ADJUSTABLE FLOW RATES	1.5–6 oz/min (interchangeable nozzles)

BACKPACK FOGGERS

TWISTER XL3

COMPACT DESIGN WITH POWER ABOVE ITS WEIGHT CLASS.

MOTORIZED KNAPSACK ULV SPRAYER

When you have a lot of ground to cover, you want the most advanced and sophisticated backpack fogger on the market. The Twister XL3 features a remarkable nozzle and blower system that outperforms competitors in value, durability and performance in open-air spaces like stadiums and amphitheaters. Compact, lightweight and designed to minimize engine vibrations, the Twister XL3 is ergonomically suited for extended use.

FEATURES

- Delivers both water- and oil-based formulations
- 4-stroke engine with low emissions and high performance
- 1-gallon pressurized formulation tank

DUSTERS & DUST APPLICATION

ACCURATE APPLICATION IN ANY SPACE.

Our versatile line of dusters feature products for all dust applications from commercial kitchens to bed bug treatments.

PEST CONTROL PRODUCT CATALOG
DUSTERS & DUST APPLICATION

BULB DUSTER

FEATURES

- Excellent for granule or dust applications
- Flexible base on extensions for hard-to-reach areas
- Extra tip extension for hard-to-reach areas
- Extension doubles as siphon tube if needed
- All plastic tips for application around electrical outlets
- Belt clip

BULB DUSTER

ITEM #	DESCRIPTION	MODEL #	ORDER #
1	Bulb Duster	1150	11005810

MINI DUST-R

FEATURES

- Chamber holds 0.5 lb. of dust, 7 oz. of granules
- Consistent delivery of granules
- Tip kit is stored inside the plunger tube

MINI DUST-R

ITEM #	DESCRIPTION	MODEL #	ORDER #
1	Mini Dust-R	1151-M	11005850

HAND DUST-R

FEATURES

- Chamber holds 2 quarts of dust
- Extension adds a static charge to the dust
- Ideal for treating attics and crawl spaces
- Includes 12 inch extension with 90° off-set at end of the tube
- Variety of tips included

HAND DUST-R

ITEM #	DESCRIPTION	MODEL #	ORDER #
1	Hand Dust-R	1152-A	11005800

LONG REACH GRANULAR DUST-R

FEATURES

- Chamber holds 2 quarts of dust
- Ideal for treating attics and crawl spaces
- Great for treating wasp nests
- 3-14 inch extensions
- Extension adds a static charge to the dust

VERSADUSTER

Great for all dust applications from commercial kitchens to bed bug treatments.

FEATURES

- No batteries required
- XR Valve
- Works with all dust formulations
- Easily plugs into any power source
- "No Clog" design applies a dust application with each pull of the trigger
- Available as a kit (without compressor) for use with a PAS or Versafoamer
- Heavy duty fan cooled compressor unit for long service life. Electrical connection is made by use of a standard extension cord.
- Adjustment knob to control dust output.

TERMITE CONTROL PARTS

Get tips, valves, pipes and more parts to make your termite control equipment unstoppable.

SERIES 400 TERMITE TOOL MODELS

Termite Tool Models are based on the valve (Versagun, Versatool, or Robco) and on the no-drip feature. A check-valve at the end of the 7/16 rods provides no-drip. These Models are 415, 425, and 435. The 410, 420, and 430 Models do not have the check valve. All Models come with a valve, a set of three stainless steel pipes (one .625 inch, and two .4375 inch), a Foot Ram for the .4375 inch diameter pipe, and a Tip Kit (4 tips).

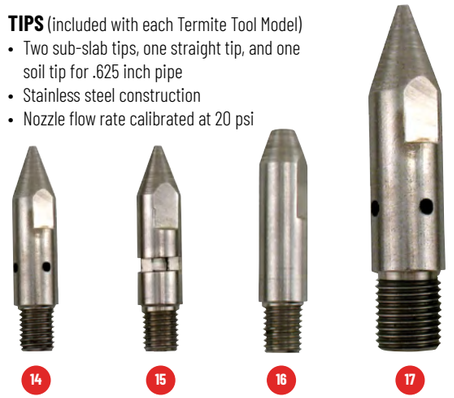
- 4 precision delivery tips included
- Quick-change adapters on all pipes
- Meet current labeling requirements of termiticides
- Tip shut-off available on models 415, 425, 435

1 - 3 VERSAGUN

- Light-weight aluminum
- Balanced trigger for less operator fatigue

TIPS (included with each Termite Tool Model)

- Two sub-slab tips, one straight tip, and one soil tip for .625 inch pipe
- Stainless steel construction
- Nozzle flow rate calibrated at 20 psi



4 - 6 ROBCO QCG

- Pressure gauge port at valve
- Converts to a perimeter spray gun

7 - 10 VERSATOOL

- Economical and durable

11 - 13 PIPES

- All soil and sub-slab pipes are stainless steel
- Variety of lengths for all applications
- Comes complete with foot ram assembly

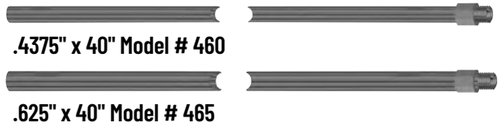
TERMITE CONTROL PARTS

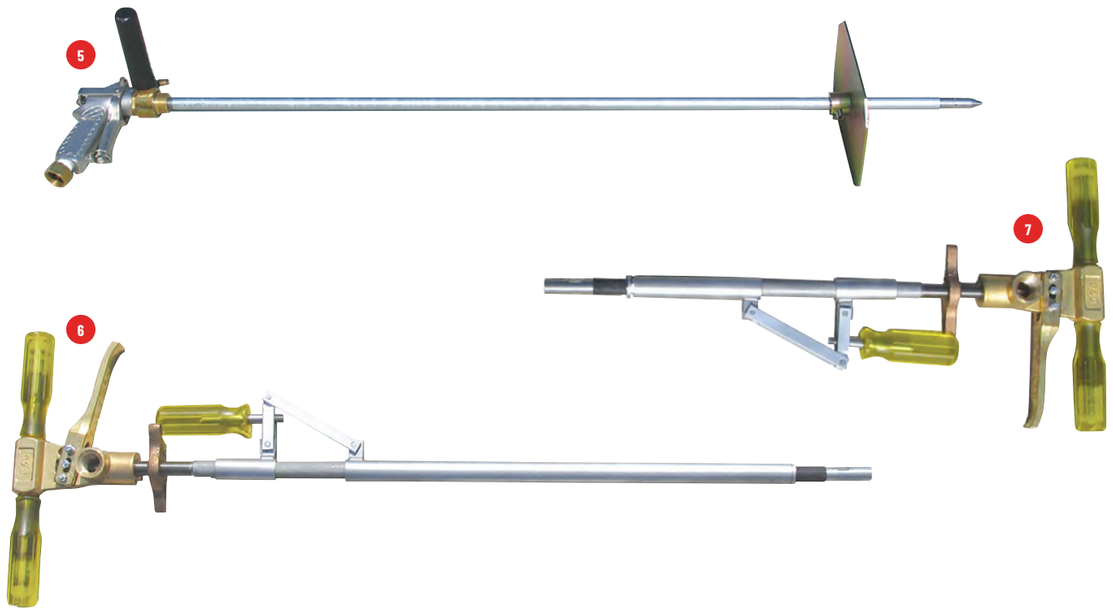
1 - 4 OPTIONAL TERMITE TOOL TIPS AND EXTENDA-PIPES

- Fits All Series 400 Termite Tools



SUB-SLAB INJECTORS AND SOIL RODDING TOOLS

Sub-slab injectors are for application beneath concrete floor to reach the void below, or to treat through tile or wood flooring to reach a void or space beneath the concrete floor. The injection hole through the substrate is sealed with an expandable rubber gasket. Each Injector Kit has two directional tips (180 and 360 degrees). The tips have 2 gallon / minute flow rate and check valve provides tip shut-off. The Sub-Slab injector #6 is 28 in high and ideal for treating in narrow spaces, the Sub-Slap injector #7 is 18 in high.



TERMITE CONTROL PARTS

TREBOR® TRIPLE SEAL

The most effective and easiest plug to install for termiticide applications. A hollow core and three flexible lips allow this patented plug to conform to hole irregularities better than solid core plugs. Available in three sizes. Hole size clearly marked on top to eliminate errors.

FLY LIGHTS

KEEP FLIES OUT OF SIGHT.

Our complete line of fly lights feature leading patented innovation and beautiful design for unbeatable performance. With proven, industry-tested efficacy, you can select from specialist, glue board, decorative and electric grid fly lights to achieve maximum performance in any environment.

PEST CONTROL PRODUCT CATALOG
FLY LIGHTS

GLUE BOARD FLY LIGHTS

Glue board fly lights use UV light to attract flying insects to the unit, then use a glue board to retain the flying insects. As the insect is caught and retained whole, glue board fly lights are ideal for more sensitive environments. Glue board fly lights are ideal for use in commercial front-of-house areas, commercial kitchens and industrial food preparation zones.

INFINITI™
GAME CHANGING FLY LIGHT TECHNOLOGY.

Designed around the UV LED source, Infiniti™ delivers game changing unique fly light technology to the professional flying insect control market. Infiniti™ differentiates itself from other glue board fly lights by utilizing a unique patented* glue board and patented* UV source to deliver superb efficacy. Fly catch trials have shown that Infiniti™ offers comparable catch results to a traditional 45W UV fly light which uses fluorescent lamps while offering 65% savings in energy running costs!

Infiniti™ is the ultimate choice for a wide range of commercial applications, with additional benefits including the ultra slim profile and bottom loading glue board which make the unit perfect for areas lacking in wall space. The low energy consumption of the unit benefits the environment by reducing emissions and pollution caused by energy generation. With a stylish and contemporary aesthetic, Infiniti™ incorporates features that make servicing and installation quick and easy. The brushed aluminum plated front guard has magnetic closures integrated into the unit, allowing tool free access. A specially designed Glupac® glue board slides in from the bottom of the unit, and sits directly in front of the UV LEDs, improving accessibility and allowing for a slimmer profile fly light.

The unique position of the UV LED strips behind the glue board* helps to increase the capture rate by reducing the common problem of flying insects flying around the UV source without getting caught. The distinctive LED strips* also have an effective UV output life of 3 years, which reduces servicing time and inventory management. Infiniti™ has been specially engineered with curved glue board runners within the unit to provide rigidity to the glue board, preventing it from bowing and maximizing the efficacy of the glue board.

FEATURES

- Glue board access from the bottom for quick and easy servicing
- Low energy running costs
- Compact model for discretion and space
- Restricted installations
- Quick tool free access gives simple access to consumables for easy maintenance
- High efficacy Pelsis UV LED strips provide a 3-year effective life
- Designed for use with Glupac® glue boards with UV stabilizer
- *patents pending

GLUE BOARD FLY LIGHTS

HALO

CONTEMPORARY STYLE MEETS COMMERCIAL EFFICACY.

With a contemporary, discreet aesthetic and commercial efficacy, the second-generation Halo is the most versatile glue board fly light available for use across a range of commercial applications. Halo is available as a slimline 15, 30 and 45w model, providing a high-quality insect control solution for small or large areas. Offering a wide range of installation options, the second-generation Halo can be vertically or horizontally wall mounted, or desk mounted using the specially designed desk mounting feet. The compact 15w unit can even be discreetly mounted above doors for areas where space is restricted. The Halo is quick and easy to service; the swing down front guard provides complete access to the UV bulbs, while the glue board can be easily changed from either side of the unit. The range uses high efficacy 15w UV bulbs for reduced inventory requirements.

FEATURES

- Commercial efficacy with a contemporary discreet aesthetic for a wide range of applications
- Side access to glue board for quick and easy servicing
- Aluminium removable debris tray
- Closable light apertures for maximum light output or prevention of dust ingress
- Compact 15w model for space restricted installations
- Quick tool free access gives simple access to consumables for easy maintenance
- Unique dual wavelength Synergetic® Technology for an increased catch
- Designed for use with Glupac® glue boards with UV stabilizer
- 28% increase in UV irradiance from first generation (Halo 30 and Halo 45)
- Desk mount feet and feet fixing pins are available for HL15 and HL45
- Application: commercial kitchen, front of house, industrial food preparation areas

GLUE BOARD FLY LIGHTS

EDGE®

Developed to be the most effective glue board fly light on the market, Edge® is designed around patented (European Patent No. EP2269448B) glue board technology to catch significantly more flying insects than traditional glue boards. As the glue board is inserted into the flylight it self-folds at the desired points, creating a unique form around high efficacy Synergetic® UV bulbs. This unique design forms edges, proven to be more attractive to flies, maximizes useful UV light output, and creates a 30% larger glue area than traditional glue boards,creating a staggering 31.5% increase on a normal catch rate!

The unique glue board form provides three features shown to better catch flying insects:

1. The glue board forms edges, proven to be more attractive to flies
2. 30% larger glue area than traditional 'flat' glue boards
3. The glue area is equidistant from the UV bulbs, maximizing the useful glue

FEATURES

- Desk mount feet and feet fixing pins are available for edge. Please contact Pelsis to find out more.
- Application: commercial kitchen: industrial food preparation, front of house

SPECIFICATIONS

GLUE BOARD FLY LIGHTS

FLYTRAP PROFESSIONAL™

Flytrap Professional™ (FTP) provides a professional and hygienic solution to insect control for sensitive areas such as food preparation areas. One of the most effective professional units on the market, Flytrap Professional gives 360° of light output and the simple glue board and bulb replacement makes Flytrap Professional extremely service friendly. Available as a 30w white metal unit and a new 80w stainless steel device, Flytrap Professional can be mounted by seven different methods providing one of the most flexible and versatile professional fly light brands on the market.

FEATURES

- Choice of seven mounting options for maximum versatility
- Simple glue board and bulb replacement
- Provides 360º light output and ease of access for flying insects
- Open design to increase attractant area
- Designed for use with Glupac® glue boards with UV stabilizer
- High efficacy shatterproof UV bulbs
- All metal construction
- Room coverage: 2600 ft2
- Application: industrial food preparation areas

SPECIFICATIONS - 30w WHITE METAL

DIMENSIONS	H 5.5 in / W 12 in / L 18.5 in
COVERAGE	860 sq ft
BULBS	2 x TPX15-18S
GLUE BOARDS	1 x GB001
WEIGHT	8.5 lbs

SPECIFICATIONS - 80w STAINLESS STEEL

DIMENSIONS	H 6.25 in / W 12 in / L 25.25 in
COVERAGE	2600 sq ft
BULBS	2 x TPX36-24S

SPECIALTY FLY LIGHTS

Demanding environments can often require specialist flylights to ensure the highest standards in hygiene and safety.

HALO AQUA

Part of the comprehensive Halo range, the Halo 45w Aqua model is suitable for use in harsh environments that may require hosing down. This Halo Aqua model incorporates FEP coated shatterproof bulbs and a robust construction, while maintaining a contemporary design. Offering a variety of installation options, the Halo 45w Aqua can be wall mounted vertically or horizontally. With a swing down front guard, it provides complete access to the UV bulbs and glue board and the quick release lamp holder covers make it extremely quick to service.

SPECIFICATIONS

DIMENSIONS	H 16 in / W 4.5 in / L 23 in
COVERAGE	1300 sq ft
BULBS	3 x TGX15-18S
GLUE BOARDS	1 x GB013 (large)
WEIGHT	14.5 lbs

FEATURES

- Stainless steel construction
- Commercial efficacy with a contemporary discreet aesthetic for a wide range of applications
- Side access to glue board for quick and easy servicing
- Aluminum removable debris tray
- Unique, quick release lamp holder covers protect against water ingress
- Closable light apertures for maximum light output or prevention of dust ingress
- Quick tool free access gives simple access to consumables for easy maintenance
- High efficacy shatterproof UV bulbs
- Designed for use with Glupac® glue boards with UV stabilizer, made from durable PVC that can withstand hosing down and harsh environments
- Part of a comprehensive range of commercial glue board fly lights (see page 12 for more details)
- Application: commercial kitchen: front of house, industrial preparation areas

DECORATIVE FLY LIGHTS

Designed for use in front-of-house areas, decorative fly lights discreetly protect areas which are highly visible to customers. Insects are attracted by UV light then retained with highly effective glue boards to ensure that flying insects are kept at bay. Decorative units are ideal for use in restaurants, cafes, hotel lobbies, reception areas, food service and dining areas.

HALO CURVE

A beautifully designed, decorative fly light, the Halo Curve is the perfect addition to front-of-house areas. The elegant shaped facade is punctuated by stylish detailing, hiding caught flies from the view of customers in restaurants, hotels, cafes and bars, and finished with cobalt grey UV stable polycarbonate edging. Easy to service, the front guard pivots to allow quick and easy tool free access to the two 15w bulbs and glue board, without the need to remove the guard during servicing.

SPECIFICATIONS

DIMENSIONS	H 10 in / W 4.75 in / L 20.25 in
COVERAGE	650 sq ft
BULBS	2 x TGX15-18
GLUE BOARDS	GB005
WEIGHT	6 lbs

FEATURES

- Elegant detailing and slim decorative design
- Part of the coordinated Halo range
- Ultra-discreet fly catching glue board hidden from view
- Horizontal or vertical mounting
- Quick and simple IEC mains socket, or discreet hard wiring option
- Easy tool free access and efficient servicing
- High efficacy UV bulbs
- Designed for use with Glupac® Glue boards with UV stabilizer
- Application: Front of house

DECORATIVE FLY LIGHTS

NECTAR

Nectar offers a highly effective in-counter solution to flying insects, providing versatile installation and simple servicing.

FEATURES

- Simple in counter or wall mounting options
- Unique dual wavelength Synergetic® technology for an increased catch
- Two glue boards positioned close to UV bulb create large catch area
- Two easy to change common glue boards, with grids for simple insect analysis
- Variable shield keeps insects hidden from customer sight and changes the direction of the direct light where required
- Contemporary design includes removable clips for in-counter advertising
- Robust stainless steel and UV stable polycarbonate construction
- Fitted with unique dual wavelength shatterproof
- Application: Full in-counter + food display area

DECORATIVE FLY LIGHTS

LURALITE PROFESSIONAL

Developed as a highly effective but discreet solution for insect control, Luralite™ fly lights are ideal for use in restaurants, bars, cafes and other front of house applications. Luralite is available in two sizes with the compact Luralite CentoPlus emitting 18 watts of UV light and the larger Luralite Professional, offering a higher light output and a larger glue board for increased efficacy. Both styles are easy to service and are designed for use with genuine Glupac® glue boards, which incorporate UV stable dry glue for longer life and an increased catch.

SPECIFICATIONS

DIMENSIONS — H 7.25 in / W 8.25 in / L 28.25 in
COVERAGE — 538 sq ft
BULBS — 2 x TPX15-18
GLUE BOARDS — 1 x INL121
WEIGHT — 10 lbs

FEATURES

- A simplified design increasing performance and reducing service time. By removing the 'reflector top', the new design is proven to emit 44% more UV irradiance, maximizing the attraction of flying insects.
- Application: Front of house

DECORATIVE FLY LIGHTS

FLYPOD

Flypod® incorporates several unique features to provide commercial effectiveness and domestic serviceability. Designed specifically to be quick and easy to service, Flypod incorporates a patented rear glue board removal system, ensuring the user doesn't come into contact with dead flies or the sticky glue board.

FEATURES

- Patented rear glue board removal provides ease of service for the user
- Unique cone shaped body traps fly inside before catching it on the glue board
- Unique curved base sits flush to the desk top allowing flies to crawl up to the UV light source
- High efficacy UV bulbs
- Designed for use with Glupac® glue boards with UV stabilizer
- The polypropylene diffuser distributes the UV light throughout 180° whilst discreetly hiding caught flies
- With its stylish and compact design, Flypod discreetly fits in with any front of house or domestic environment
- Application: Front of house

SPECIFICATIONS

DIMENSIONS — H 12 in / W 6.75 in / L 7.75 in
COVERAGE — 323 sq ft

DECORATIVE FLY LIGHTS

AURA

ULTRA DISCREET AND ULTRA STYLISH.

With an attractive, contemporary design, the Aura™ decorative fly light is an ultra-discreet unit ideal for front-of-house applications.

Perfect for use within cafes, restaurants, bars and hotels, the Aura offers an elegant, modern aesthetic alongside innovative, easy-to-service features and maximum efficacy. The unique circular registered design of the unit allows light to attract flying insects from a full 360° around the unit, attracted by the unique Synergetic® green light, while the design of the discreetly positioned glue board gives a 100% useful glue area which remains hidden from customer view.

FEATURES

- Contemporary detailing and elegant clean lines
- Beautifully polished facade
- Slim design ensures that the unit is unobtrusive
- Ultra-discreet fly catching glue board hidden from view
- 100% useful glue board area ensures maximum efficacy
- Ensures compliance with food hygiene legislation
- Unique dual wavelength Synergetic® technology for an increased catch
- Easy tool free access and efficient, fast servicing
- Robust stainless steel and UV stable polycarbonate construction
- Application: Front of house

ELECTRIC GRID FLY LIGHTS

Electric grid fly lights use UV light to attract flying insects to the unit, then use an electric grid to kill the insects, before retaining them in a catch tray to allow hygienic disposal. Electric grid fly lights are ideal for use in commercial backroom, commercial front of house and industrial backroom areas.

ALLURE

Proven to have more than 60% greater UV light output than traditional electric fly lights. With an innovative, patented* open top design to maximize light output of the Synergetic© UV bulbs, this truly unique zapper fly light releases light from the back, sides and top of the unit, creating 67% more useful UV light output than traditional fly lights utilizing the same power UV bulbs.

The unique Z-shaped killing grid provides a 20% larger fly killing area, ensuring that the unit easily copes with the increased number of flies attracted by the greater light output. Designed with serviceability in mind, the killing grid, deep catch tray and UV bulbs are easily cleaned and maintained while the tool free, drop down guard, also holds the catch tray during servicing making the unit quick and easy to service. Independent tests show that the Allure attracted 448% more flies than the leading traditional 30-watt unit.

FEATURES

- Innovative, patented* open top design gives maximum possible UV light output for increased efficacy
- Unique 'Z Shaped' killing grid gives 20% larger useful killing area for increased efficacy
- Large capacity, mains interlocked catch tray with anti-blow out folds
- Unique dual wavelength Synergetic© technology for an increased catch
- Tool free, swing down front guard for quick, simple servicing
- Simple wall, ceiling or desk mounting
- Contemporary market leading design
- Application: Commercial backroom

ELECTRIC GRID FLY LIGHTS

EXOCUTOR

The Exocutor brand has been a favorite with specifiers for over 20 years, selected for its longstanding reliability and proven efficacy in demanding commercial environments. The contemporary design ensures that they are easily identified as high quality Synergetic branded products, while the carefully crafted, innovative product features deliver superior efficacy against traditional fly lights.

The Exocutor range is full of features designed to maximize useful UV light output, from the internal aluminum UV light reflectors, designed to re-use the powerful insect attracting wavelength of the Philips BL 368nm bulbs, to the unique light scoops which allow light to exude from the corners of the unit as well as the front, back and sides. Staggered bulb positioning ensures that the maximum amount of UV light is radiated from all areas of the unit, luring flyng insects into the highly effective triangular killing grid.

FEATURES

- Unique corner light scoops give increased UV light output
- Internal aluminium UV light reflectors
- Staggered, high efficacy UV bulbs for maximum light output
- Reliable high specification 3750v transformer
- Unique triangular killing grid for a larger effective catch area
- Strong UV stable polycarbonate and coated mild steel /stainless steel construction
- Large capacity, mains interlocked catch tray with anti-blow out folds
- Simple wall, ceiling or desk mounting
- Easy cleaning and servicing
- Application: Commercial + industrial backroom

SPECIFICATIONS

DIMENSIONS — H 10.5 in / W 5.5 in / L 27.25 in

FAQs

POSITIONING A FLYLIGHT

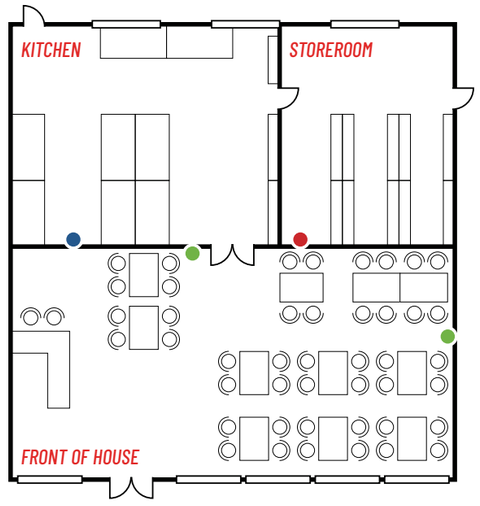
Every application is unique, so each situation requires an individual assessment for fly light positioning, however, there are basic principles that should be followed:

- Recommend enough units to cover the area to be protected
- Install units away from sources of light competition, such as windows, doors and high powered artificial light sources
- Consider sources of heat and airflow, such as heaters / AC units
- Don't install electric grid units directly above sensitive areas, such as food preparation areas
- Glue board units should be used in sensitive applications such as food preparation or production areas
- Consider access for installation and future servicing
- Wherever possible, fly lights should be positioned at 90° to sources of natural light, such as windows, doors and skylights
- Fly Lights should be positioned in between potential entry points, so as to intercept flying insects before they reach sensitive areas
- Fly lights should not be installed either too high or too low in the area to be protected, with an optimum height of around 6 feet and 7 inches

FLYMAP

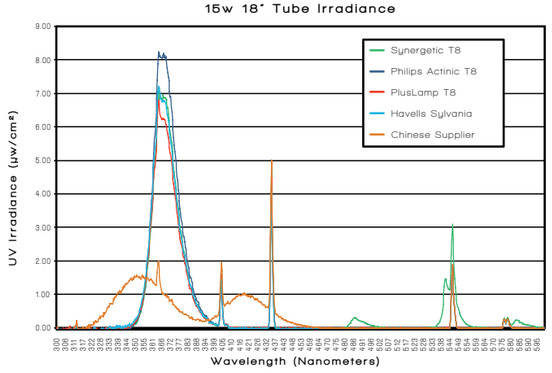
INSECT CONTROL

- Electric Grid – Backroom
- Glueboard – Sensitive area
- Decorative – Front of house



HOW OFTEN SHOULD BULBS BE CHANGED AND WHY?

We recommend that UV bulbs are changed every 12 months to ensure maximum efficacy. The levels of UV produced by fluorescent bulbs deteriorates rapidly throughout the life of the bulb. While the bulb will continue to glow blue or green indefinitely, after approximately 8,000 hours the amount of useful UV (which humans cannot see) drops to a level where it is no longer attractive to flying insects. As a result, UV bulbs must be replaced annually to ensure they remain effective in producing useful levels of UV. This replacement cycle is typically undertaken just before the peak insect season, (March/ April in North America) to ensure the flylight is producing the maximum amount of UV throughout the critical insect season.



BULBS

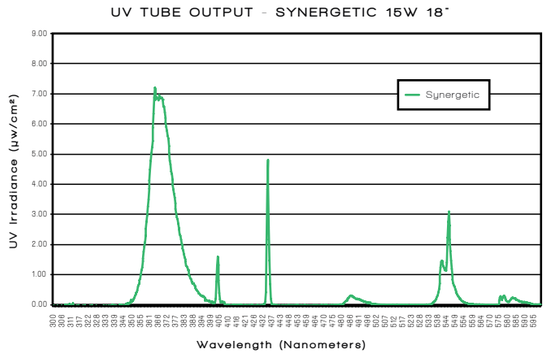
SYNERGETIC

Easily recognized by their glowing green light, Synergetic® bulbs have been developed to attract a much wider range of flying insects than traditional blue UV bulbs. Based upon a unique phosphor mix, advanced technology ensures that a broader 'two peak' wavelength is maintained (368nm and 540nm) attracting a wide range of insects including stored product moths, while attracting the common housefly as effectively as traditional blue UV bulbs, giving you the best of both UV technologies. Extensive testing has been carried out over many years by independent entomologists and test laboratories, showing the benefits of green light in combination with UV.

A wide diversity of insects were shown to be more attracted to Synergetic® light, including greenhouse whiteflies, silver leaf white flies, thrips, leaphoppers, Indian meal moths, Mediterranean flour moths3, tropical warehouse moths, warehouse moths4, plus many more!

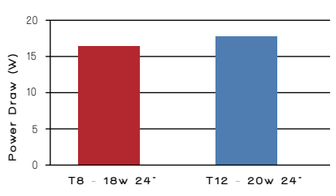
DID YOU KNOW?

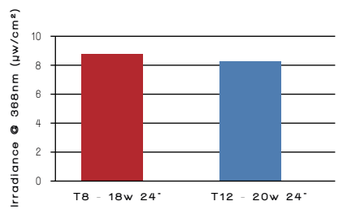
Many insect pests of public health, stored product and agricultural importance have evolved visual pigments which allow them to perceive green light. 5 Recordings of electroretinograms in housefly eyes found peaks in both UV (340-365nm) and blue green (450- 550nm) 6 with similar sensitivities found in other Diptera eg. Calliphora vicina Meig7, Haematobia irritans L., Musca autumnalis De Geer, Stamoxys calcitrans L.8, Glossina mortisans mortisans Westw.9, and Fannia canicularis L.10,as well as the mosquito Aedes aegypti (323-345nm and 523nm) 11. Several Tabanid species were also found to have a peak activity of 400-600nm12.



PHILIPS

Philips Lighting is a leading provider of lighting solutions for professional applications. The range of Philips UV bulbs is dedicated to providing innovative, energy-efficient solutions and applications for lighting, based on a thorough understanding of customer needs. Philips bulbs are available in a range of sizes and shatterproof options.





Philips bulbs are available in a comprehensive range of models, including shatterproof versions. The range also features the innovative new T8 18w and 36w tube, offering a contemporary low power, increased efficiency replacement for 20w and 40w T12 bulbs.

DID YOU KNOW?

Some stored-product beetles respond better to blue UV light, including the cigarette beetle, the merchant grain beetle, the rice weevil and the red flour beetle.

BULBS

PLUS + LAMP

Offering superb value, the PlusLamp™ range offers users a wide choice of 368nm blue UV bulbs in both standard or shatterproof options. Testing showed that the PlusLamp™ 368nm range experienced a lower rate of deterioration than many leading brand UV bulbs.

SHATTERPROOFING

Shatterproof bulbs provide peace of mind in sensitive areas by retaining glass shards if the bulb is broken. All our ranges can be shatterproofed, ensuring that you can choose your ideal bulb to help you protect even the most sensitive areas, including food preparation and assembly areas. Shatterproof bulbs MUST be installed in areas operating a 'glass free policy'. The Fluorinated Polymer (FEP) material used for all our sleeving is designed specifically for optical transmission and allows 97% of effective UV light to pass through the coating. As a result, the maximum possible amount of useful UV irradiance passes through the sleeving to effectively attract insects. With only 3% of the irradiance being absorbed into the material, the structural integrity of the sleeving is maintained for the full 12 month life of the bulb, preventing discoloring and ensuring all glass shards are retained in the event of a breakage.

LED TECHNOLOGY

LED (Light Emitting Diode) technology has become more viable in recent years due to the increase in demand across a wide range of industries and applications. Due to the many benefits of LED technology, investment in the research and development of this technology has been made over many years, to ensure its suitability for use in the flying insect control industry.

Pelsis LED technology offers a wide range of benefits to UV flylights. One of the main benefits of LED technology is that they do not contain any toxic elements. In addition to this, their low energy consumption and high UV light output efficiency make them both more environmentally friendly and cost effective to power, in comparison to UV flylights that use traditional fluorescent bulb technology. The compact size of the Pelsis LED strip compared to fluorescent glass bulbs allows for storage and transport cost savings for our customers.

Another benefit to LED technology is that it's not only more durable compared to current UV fluorescent bulbs. There is also a lower risk of premature lighting failure, which can be caused by shocks and vibrations, a fault more commonly seen in fluorescent bulbs. Pelsis LED technology, when paired with effective heat management features like those found within Synergetic LED fly lights, ensures a long working life for LEDs which helps to reduce ongoing service costs.

JUST SOME OF THE BENEFITS OF PELSIS LED TECHNOLOGY

- 3 year effective life - reduced maintenance costs
- Energy efficient – offers lower running costs and reduced electricity consumption
- Environmentally friendly – houses and produces zero toxic elements
- Durability – more resistant to damage from vibration and shock
- Compact – reduced unit and storage space

GLUEBOARDS

GLUPAC

Glupac® glueboards are designed to perfectly complement your Synergetic® f l y l i g h t , offering consistently high standards of performance and quick servicing times.

EASY FLY COUNT GRIDS

Glupac® glueboards feature simple grids to make it quick and easy to monitor and record fly counts and identify species. This allows valuable, accurate feedback to be kept for hygiene audits and shared with the end user on a regular basis.

SILICON COATED RELEASE PAPER

Glupac® release paper is silicon coated to ensure that it releases from the glue covered board quickly and simply, leaving the glue in place. This guarantees speedy service times and ensures that there is no contact between the glue and the service technician.

FEATURES

- Unique flexible glue application allows for maximum glue area
- Advanced UV stable glue guards against the glue drying out over a four week period
- Dry glue formulation reduces glue run from exposure to bulb heat and mess free servicing
- Consistent thickness of glue application ensures no areas are too thin to retain the caught insect
- Varnished base material reduces absorption of the glue
- High quality silicone coated release paper provides easy peel action, less mess and reduced service times

RODENT CONTROL

OUTSMART RODENTS WITH DISCRETION AND SIMPLICITY.

B&G rodent control stations do all the work for you. Use non-fatal bait to monitor activity or a combination of bait and snap-trap for final control.

RODENT CONTROL

FAST-CATCH

RODENT CONTROL DOWN TO A "T."

The Fast Catch can be used for monitoring with non-toxic bait and then when activity is present a snap trap can be used for final control. It can also be utilized as a “stand alone” snap trap or rodent bait station.

The Fast Catch station is available in two models: Station-only design, and a Rodent Alert design. The Rodent Alert stations feature a ‘pop-up alert’ that indicates when the snap trap inside the station has been triggered.

FEATURES

- Heavy duty construction
- Easy open single lock design
- Reusable – designed for years of service
- Tamper resistant – lid recesses into base
- Low profile design for increased rodent activity
- Fits all professional rat snap traps and includes bait rods
- Pop-outs in rear of station allows for attachment

PLACES TO USE

- Sensitive Accounts – where rodenticide is banned
- Residential Accounts – keeps rats hidden from occupants
- Commercial kitchens, restaurants and office complexes

RODENT CONTROL

RODENT STATION ATTACHMENT SYSTEM

FEATURES

- The station attachment system consists of 2 clamps, a metal screw and washer. It is designed for use with a 12 inch x 12 inch (1.5 inch thick) concrete paver, and only with B&G rodent stations
- Easy and economical way to secure the Fast Catch and rodent bait station
- Holds station securely to block and is reusable pop up alert

SPECIFICATIONS

- Attaches any B&G rodent station to a 12 inch x 12 inch paver block
- Installs in less than 30 seconds
- Heavy duty metal construction
